

Assignment 1: Setting up a cloud server

Follow the steps below and setup a cloud server on "cloudways.com".

1. Open a free account that provides you with 3 days of trial
2. Create a virtual server (preferably using digital ocean cloud provider)
3. Create a website hosted on the server (preferably a WordPress website)
4. Finally, come up with a report which includes the following:
 - a) The specifications of the created virtual server, including: ram, storage space, and server location.

(4 marks)
 - b) Provide at least 3 Screenshots of the different steps taken during setup

(3 marks)
 - c) Provide a screenshot of the website home page that will be hosted on the server

(2 marks)
 - d) Provide server public IP and the url of the website that you have developed

(2 mark)

Total marks : **10 marks**
